

## TRAINING TASK 2 (ANGULARJS SPRINGBOOT APPLICATION)

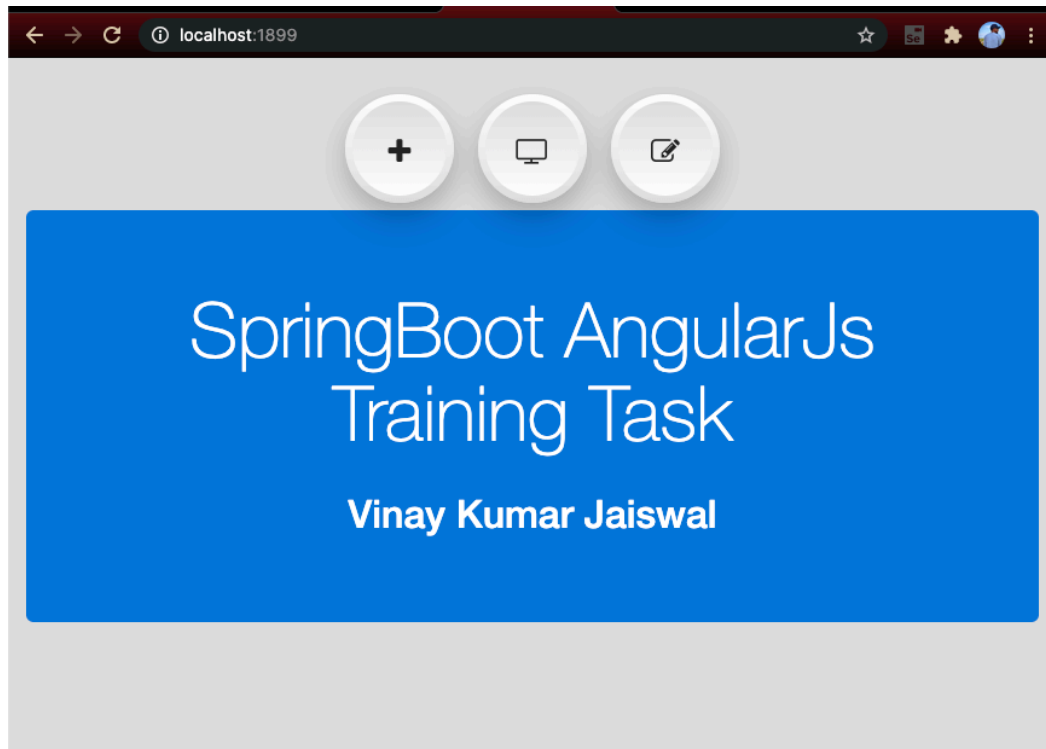

### 1. The overall project structure.

## 2. This is the main landing page.

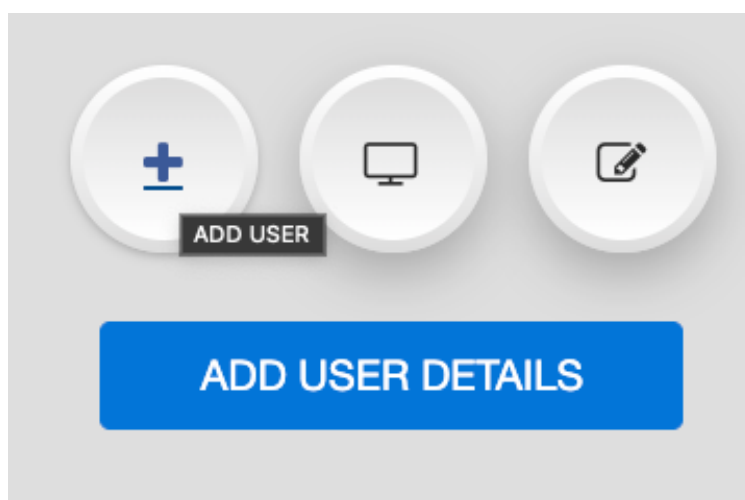

In this I have used combination of bootstrap and CSS, to give a feel of pressing an actual button. When you hover the mouse pointer on the icon it will display a **tooltip**, for what the icon is about and the button will animate as if, it is being pressed.

Url: localhost:1899

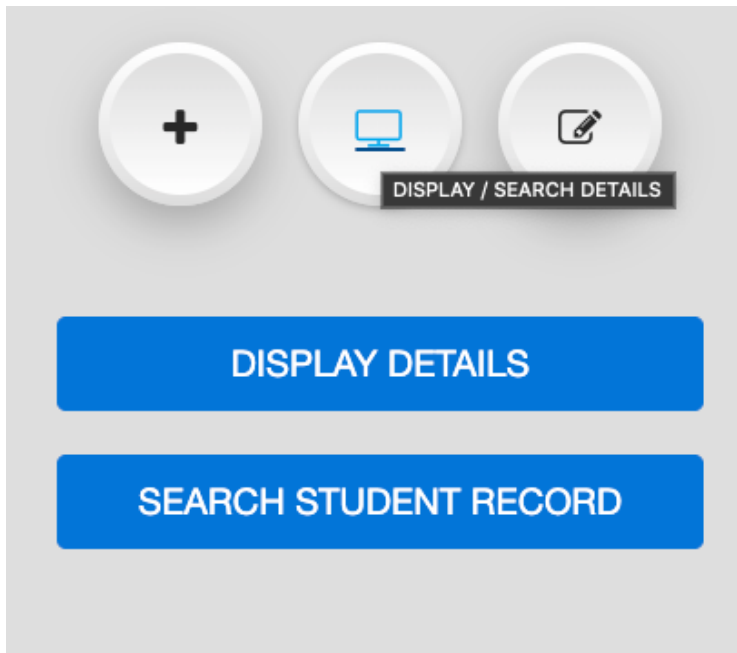

## 3. To add new record.

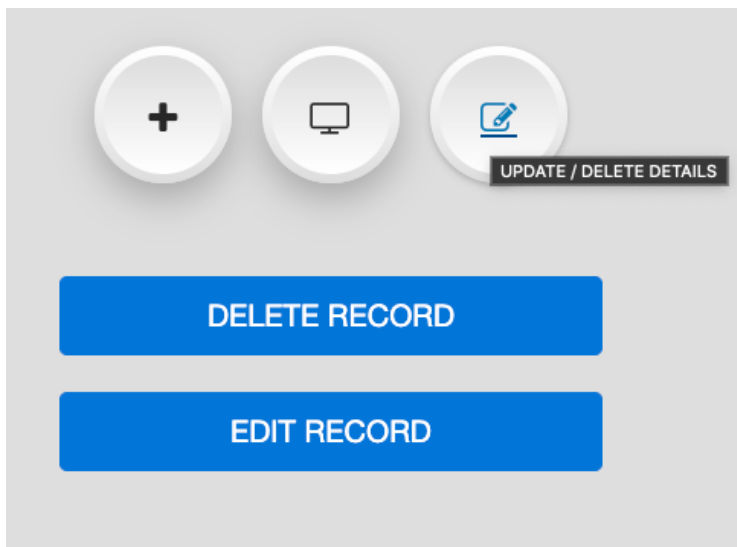

To add new user. Click on the **ADD USER DETAILS** button or enter the url  
Url: localhost:1899/form

**4. To Display and Search record. Url:** localhost:1899/load  
This to Display and search records from the database.

**5. To delete and update records.**  
Url: localhost:1899/update

6. PostgreSQL database

Data Output		Explain	Messages	Notifications
